

FOR SALE

100+ Year Old Hemlock Reclaimed Wood Over 2 Million BF

- **First Generation #1 & #2 Northern Hemlock**
- **Rough-Sawn 2" x 6" s**
- **12' to 14' lengths**
- **Recovered from Historic Manitowoc, WI Factory**

NIAGARA Worldwide LLC will reclaim over 2 million board feet of 100 year old Hemlock. Each rough-sawn 2" x 6" (actual 1-7/8" x 5-1/2") is straight and true. In 1909 1,000's of these boards were laid vertically on their 1-7/8" edge and originally sandwiched together to form the subfloor of the historic Mirro Manufacturing facility in Manitowoc, WI. The bottom edge is painted with non-lead based paint (testing data available). The quality of this wood is very high and consistent.

"This old growth Hemlock is in beautiful condition with a rich, golden and extremely tight grain that can be easily shaped, sanded and stained." Said Eric Spirtas, President of Manitowoc Development and Niagara Worldwide LLC.
